

# GVD Launches VMS 4.0 Turnkey Products

GVD announces VMS 4.0 turnkey products designed for mid-to-large projects that can power on and then be deployed.

GVD turnkey products are based on the most durable and industrial-certified hardware servers for 24/7 no-down-time operation.

With power Intel CPU and nVidia GPU, plus HA design in power supply, Giga network ports guarantee mission-critical operation anytime anywhere.

VMS 4.0 is GVD 4<sup>th</sup> generation product. The software-based suites products were first launched in 2021 April.

VMS 4.0 has become GVD flagship product installed in many enterprise customer's job sites: Bank, Factory, Government, SmartCity, Warehouse, etc.

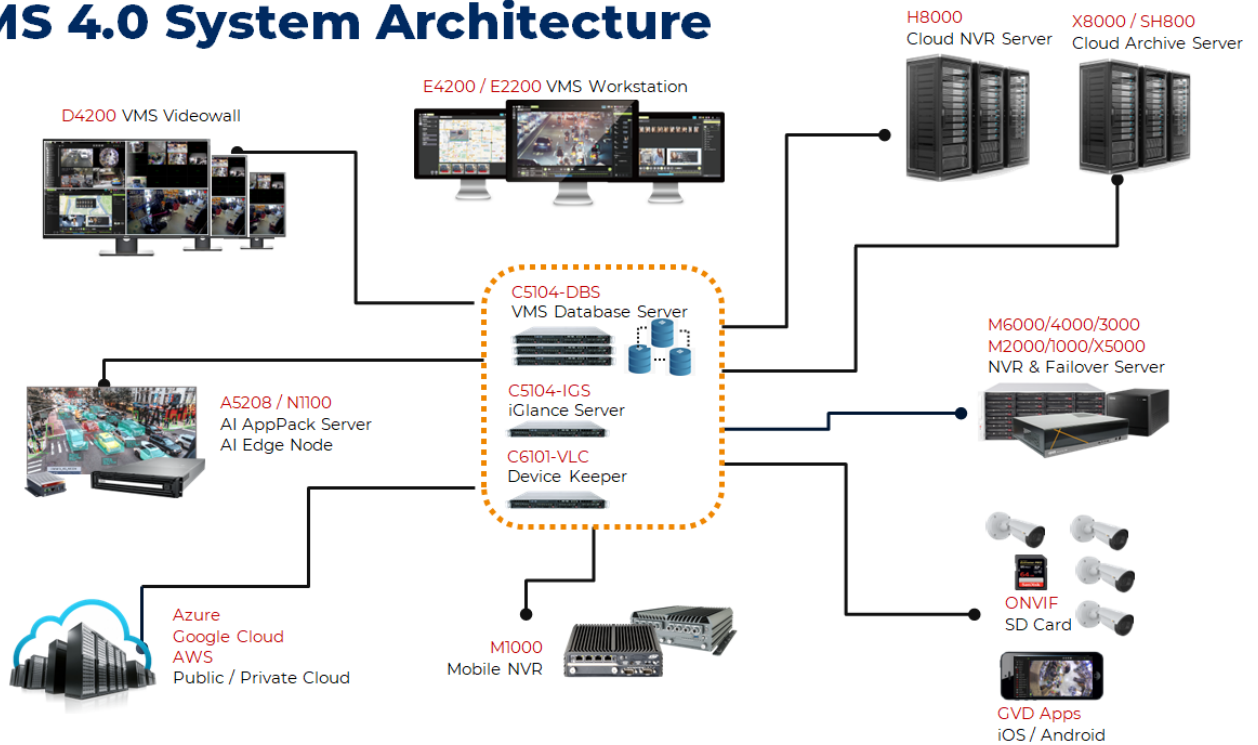

GVD VMS 4.0 is designed to run Deep-Learning AI, with a cloud-based solution combining hybrid storage. The 4.0 is capable of managing up to 100,000 channels.

With a new architecture, GVD VMS 4.0 is easy-to-grow to greatly lessen the complexity of large-system integration and communication.

The 4.0 can easily stack up to a group of workstations, video walls, NVRs, data servers, storage, 3rd-party systems, and, as previously mentioned, a large number of 100,000 IP cameras.

Also, the VMS 4.0 features iGlance Dashboard that encapsulates system big data with simple graphs in a real-time way. All system health, device status, device recording status, device recording days, common system tasks, etc., can be quantified and visualized through pies and charts.
