

# Smart City Summit & Expo 2021

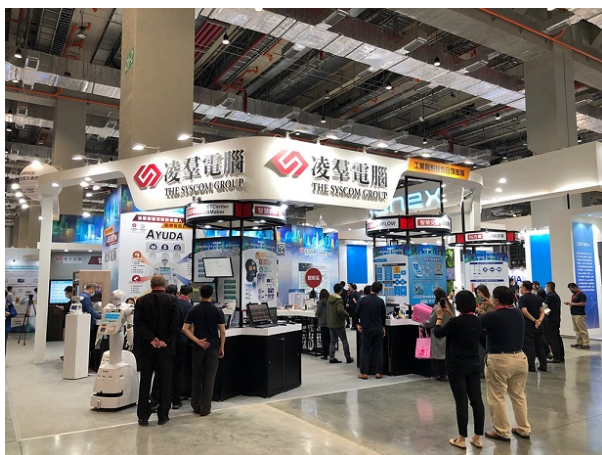

Friedrich Nietzsche once said: "What doesn't kill me, makes me stronger". ("Was mich nicht umbringt, macht mich stärker.") In Spring 2021, one whole year after the outbreak of the historic pandemic, while most parts of the world still suffer from lockdown and soaring cases and deaths of COVID-19, Taiwan stands strong amid this darkness before the dawn and announced, so late as on February 24, 2021, to have the physical show of **Smart City Summit & Expo (SCSE)**, as scheduled on March 23 to

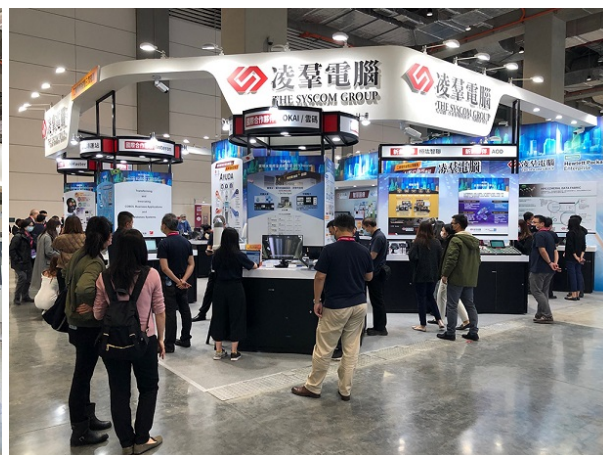

26, 2021, in NangKang Taipei.

This year the **SCSE** comes as a hybrid event, with the virtual exhibition on its online platform, the "Smart City Online", and the physical counterpart combining three sub-shows: Smart Healthcare, Smart Education, and Intelligent Transport, in the brick-and-mortar venue.

At **SCSE 2021**, GVD has once again teamed up with **SYSCOM**, Taiwan's leading systems integrator and e-commerce solutions provider, and showcased GVD's **VMS 3.8** features, including **GIS Maps** and **iGlance Dashboard**, an application that quickly sketches overall system statuses with pies and charts.
